11. **Confidentiality.** All Confidential Information, including the Know-How, shall be treated as confidential by Licensee and shall be used solely to enable Licensee to use the Software in accordance with this Agreement. Nothing contained herein shall prevent Licensee from making disclosure of any of the Confidential Information to any employee of Licensee for the sole purpose of utilizing the Software and Related Materials in accordance with this Agreement, provided that Licensee shall obtain from each employee to whom such disclosure is made a covenant of non-disclosure.

Scope of Services – Exhibit A

EASE Solution

Built upon years of industry experience, Extensible Automated Streaming Engine (EASE) is a software framework comprised of foundation and extension modules that work together to automate many otherwise manually intensive tasks. This completely hands-off solution meets the current and future needs of your entity without creating any additional work for clerks or webmasters.

- Video Capture and Encoding

EASE Encoder records content according to your broadcast schedule and transfer the recorded audio/video to the Swagit Content Network via a secure Virtual Private Network (VPN) connection, making it available for live and/or on-demand streaming.

- Indexing and Cross Linking

Using your published meeting agendas as a guide, Swagit's Managed Service Division (SMSD) indexes the meetings without any work from the city. SMSD will annotate your content by adding jump-to points with specific item headings, giving users the greatest flexibility to find the specific content they need. With these jump-to points, users can step through video by searching for or clicking specific items.

- Agenda Management Integration

If meeting packets or other related information is available online, SMSD will link them directly to the video player for easy access.

Swagit's EASE solution integrates with all Document/Agenda Management solutions.

- Archiving

Client audio/video can be stored securely on the Swagit Content Network indefinitely. Fault tolerance and high availability is assured through replication of audio/video content to multiple, geographically redundant, Storage Area Networks (SAN). Our standard packages include 80GB of storage, enough for approximately three full years of city council meetings.

- Presentation

By navigating through the video library, users can view a list of meetings chronologically and once in a selected meeting you can unleash the power of the jump-to markers to search for specific points within individual audio/video clips.

- Delivery

In order to deliver on-demand content to end users in a format that is native to their computer's operating system, Swagit can deliver content in all major streaming video formats: HTML5, Flash, Windows Media, QuickTime and Real. Swagit is proud to support HTML5 and Flash as its default formats, which has proven itself as the format of choice from such vendors as YouTube, Google Video, Facebook, ABC and NBC/Universal.

EASE Solution

- **Monitoring**

Swagit is monitoring all aspects of the Swagit Content Network to ensure its health and availability. This monitoring extends to cover remote Swagit EASE Encoders deployed on client premises. In the rare event of trouble our engineers are promptly notified so that they may dispatch a swift response in accordance with our support procedures.

- **Statistics**

Swagit collates log files from our streaming servers monthly and processes them with the industry recognized Google Analytics. Google Analytics generates reports ranging from high-level, executive overviews to in depth quality of service statistics. These reports help to highlight growth trends and identify popular content.

- **Support**

Beyond our proactive monitoring and response, Swagit offers ongoing, 24/7 technical support for any issues our clients may encounter. While our choice of quality hardware vendors and a thorough pre-installation testing phase go a long way toward ensuring trouble free operation of our EASE Encoders, we do recognize that occasionally unforeseen issues arise. In the event that our engineers detect a fault, they will work to diagnose the issue. If necessary, next business day replacement of parts will be completed. Swagit offers continual software updates and feature enhancements to our services and products for the life of your managed services contract.
