It's touched throughout the year

By many internal team members

Even more outside professionals

Lawyers

Advisors

Underwriters

Banks

Accountants

Rebate
Consultants

But we do it by emailing spreadsheets

What are we trying to accomplish

1

Make it easier for finance officers and their staff to manage debt & leases

2

Create a single source of truth for the entire working group

3

Eliminate unnecessary and damaging errors that stem from incomplete or inaccurate information

Our Clients

DebtBook was created by government and nonprofit finance teams tired of using excel and old software to manage their debt and leases.

Raleigh

Let's take a look

Implementation

“By far one of the easiest implementations in my 25-year career!”

DebtBook was outstanding with their assistance in making implementation seamless and as simple as possible!”

“DebtBook has been one of the easiest and quickest software implementations I have overseen over my 14-year career in local government Finances.”

Aileen Staples

5	Up to 500 or \$5 billion	Unlimited	\$25,000

What everyone's saying

"I absolutely LOVE my DebtBook - it makes me a better finance director!"

"DebtBook is a game changer for us"

"It saved us so so much time during audit"

"I feel like I have died and gone to heaven!"

"I used it for the first time during a meeting today - I can't tell you how helpful it was - thank you! "

"By far one of the easiest implementations in my 25-year career!"

DebtBook strives to create one piece of software used throughout the industry - it must be affordable, comprehensive and easy to use. While we do not provide specific deliverable timelines, we're working extremely hard to deliver the following features:

Amortizing Premium, Discount & Accounting Gain/Loss

Accurate, updated and designed to meet accounting standards.

Lease Schedules (GASB 87)

Review and manipulate all lease inputs within the application (e.g.: reasonable certainty of exercising extension option). View the lease liability balance, lease payments, interest expense, lease asset balance and amortization expense in an exportable table format. Export journal entries into Excel to record retrospective restatement, beginning lease balances and ongoing lease activity.

Ongoing Lease Collection / Compliance (GASB 87)

Make lease aggregation easy for everyone - key personnel receive customizable notifications requesting simple document upload - finance has audit trail of who has and hasn't entered into new lease agreements.

Net Debt Service

Model cash flows relating to items such as: variable rate resets, subsidies, expenses, reserve funds, capitalized interest, scheduled prepayments and more. While some of these Net Debt Service features will be delivered within the six month roadmap window discussed here, all are expected to be completed within 12 months.

Time Machine

The ability to view all of your debt accurately as of any previous point in time, exclusive of debt that had not been issued yet and inclusive of maturities that have since been defeased or refunded.

How much do you value?

Efficiency

Manual processes cost organizations 19 working days per year per employee, according to a recent SnapLogic study.

Better tools will save your team time throughout the year.

Succession Planning

How easily could you transition the debt management responsibility if you or a key employee left?
Rating agencies want to know.

How much do you value?

Security and Reliability

Cybercriminals are attacking governments with ransomware (Atlanta, New Orleans, Durham, Baltimore) at an alarming rate - 60% year-over-year growth in 2019.

Ensure 24/7 access to critical debt information with our secure, cloud-based platform.

Increased Confidence

Eliminating data errors will give you more confidence in the work that you, your team, and your professionals are doing every day.

How much do you value?

Creating a
Single
Source of Truth

Many internal departments use the debt information throughout the year for various purposes. Your advisors, lawyers, accountants and bankers need this information too.

Our cloud-based solution is accessible by everyone from anywhere so you can ensure everyone on the team is using up to date, accurate information.

Employee
Retention &
Happiness

Manual data entry is tedious, unfulfilling, and damages employee engagement.

How much do you value?

Reputation & Rating

Strength of management directly impacts your organization and its credit rating. Make the use of tools and technology a strength.
