A. Transmittal Letter

September 26, 2022

Webb County Purchasing Department
1110 Washington St., Ste. 101
Laredo, Texas 78040

RE: RFQ 2022-011, On-Call Material Testing Services for County Projects

Terracon Consultants is pleased to submit the attached Statement of Qualifications (SOQ) for material testing services. Terracon has been a part of the Laredo community for over 20 years, and we are proud to have teamed with Webb County, as well as other local similar entities to provide quality, on-time, on-target services. We have a fully qualified staff and the equipment ready to support Webb County with the required services.

Our firm is committed to providing these services to the Webb County in a professional and cost-effective manner. As you review our SOQ, we are confident that you will conclude that Terracon is the "right firm for the job" for the following reasons:

- Familiarity with the needs and goals of Webb County;
- Extensive local experience;
- Familiarity with local soil conditions, contractors, materials, and construction methods;
- Ready access to qualified Project Managers, Field Technicians, and Senior Supervising staff to help solve problems/issues quickly;
- Resources of a large, stable firm with the personal attention you expect from a small firm.

We are committed to providing high-quality services tailored for each Webb County project, at a competitive cost. If selected, we will commit our resources to complete your project to your satisfaction.

This SOQ is valid for ninety (90) days from the deadline of submission.

This transmittal letter is signed by a person legally authorized to bind Terracon to the representations in the response.

Thank you for your consideration during the review process. We are confident that Terracon will provide the County with a high level of service and look forward to continuing our work with you and your staff on future projects. Should you have any questions regarding the attached statement of qualifications, please feel free to contact us at (956) 729-1100.

Sincerely,
Terracon Consultants, Inc.
Texas Firm Registration: F-3272

B. Executive Summary

TERRACON COMPANY PROFILE

Terracon is permanently established to conduct business in Laredo, Webb County, Texas. The Laredo office, located at [615 Gale Street, Bldg. B., Laredo, Texas 78041](#), has been in operating since 2000. Currently, we have a staff of 6 in our Laredo office including 2 Engineers In Training (EIT). We can draw from our staff of 125 in San Antonio, which includes 15 P.E.s and 4 Professional Geologists (PG), licensed in the State of Texas, for supplemental help as needed. We can also draw resources from Austin, Houston, Pharr or any of our 150 offices located in various states.

Our Goal:

To help you deliver a project that you can be proud of tomorrow and 30 years from now.

With over 55 years of proven success, we deliver quality, responsive and cost-effective services, regardless of project size or complexity. Terracon has provided geotechnical engineering and construction materials testing services in South Texas for more than 27 years and provides these services on thousands of projects each year. We continually strive to provide our services on a timely basis with consistently high value and attention to client needs. With over 23 years of proven local success, we deliver quality, responsive and cost-effective services, regardless of project size or complexity.

With these resources, Webb County can be assured that your projects will receive the prompt and professional attention they deserve. [Terracon has demonstrated our commitment to providing professional services to Webb County since 2004.](#) We continue to add staff and related resources (equipment and vehicles) to serve the needs of our Laredo clients. Our staff is very familiar with geologic conditions in Laredo, and we have worked with virtually all of the contractors in the area. We have a proven track record of successfully meeting the needs of municipalities by providing responsive, cost effective solutions.

LAREDO OFFICE

- Fully equipped office with approximately 3,400 square feet to test aggregates asphalt, soil, concrete mortar and grout.
- Compression machine for testing concrete, concrete masonry units (CMUs), mortar and grout. Specimens are cured in water tanks in our 440 square feet curing room.
- Nuclear density gauges and sand cone equipment for use on soils and asphalt.
- Air meters to determine air content in concrete.
- Our Technicians wear company shirts that identify them with their names and drive clearly marked company pickups.
 - The Laredo office has 6 company trucks that are fully equipped with GPS tracking systems.

- Our technicians are equipped with cellular phones for dispatching purposes and for communications with clients. They can be contacted after hours and weekends.
- Our technicians are equipped with laptops for electronic data collection and reporting
- Floor profile measuring device (Face Dipstick).
- Hilti ferroscons that can identify conduits, rebar and tendons up to 12 inches deep in concrete.

PROJECT MANAGEMENT PROCESS

Terracon understands that the timely completion of projects, within an agreed-upon budget, is critical to the success of any endeavor. The ability to deliver **quality work** in a timely and **cost-effective** manner begins with the selection of professionals that join our team. Terracon recognizes that we must have a quality staff of engaged professionals, because it is people who complete projects. To meet that objective, we have assembled a team of professionals that work together effectively to meet your needs and expectations.

The Team included in this submittal is a hand-picked team of effective professionals with a track record of providing **quality work** for Webb County. Quality is ensured by dual review of all reports. For reports that include engineering recommendations, an Authorized Project Reviewer (APR) (labeled as Project Executives for the purpose of the submittal) is assigned and actively involved in the process. These APRs meet strict internal criteria and form the foundation of our Quality Program. Without exception, every project is assigned an APR who collaborates with the project manager on quality and technical objectives for the duration of the project. The APR is engaged at the proposal stage and remains on the project through execution and closeout. APRs review proposals, procedures, calculations, and final submittals to verify data quality, accuracy, analytical methods, results, opinions, recommendations, and conclusions. The APR plays a central role in our quality program, highlighted by the following four primary areas of project responsibility:

Instead of relying solely on post-review discoveries in a reactive mode, the project manager and APR collaborate throughout the project to make proactive decisions together.

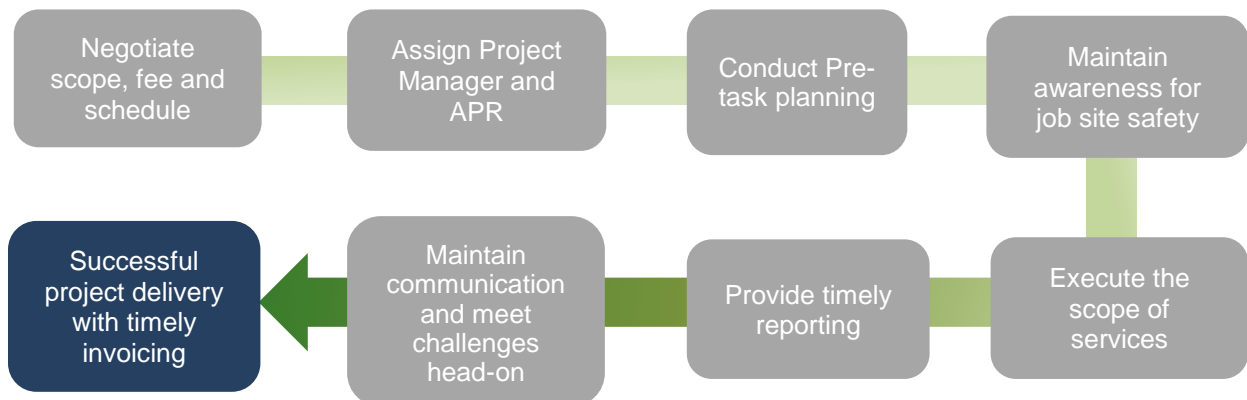

- **Quality Oversight:** The APR reviews the proposal and is involved at the kick-off meeting, and at major milestones, stages, and critical junctures providing direction and insight to guide the project to its successful completion.
- **Coaching:** The APR coaches and advises the project manager on various aspects of the project emphasizing quality, risk, on-time delivery, budget, scope of work, and other client expectations.
- **Risk Management:** The APR guides the project team to properly assess project-specific risk.
- **Safety Awareness:** The APR raises awareness at the project level by communicating with the team to focus attention on their own personal safety and on the safety of all project team members.

A primary factor in the successful completion of any project is to make sure the project team has a solid understanding of the project objectives. Once the contract has been awarded, project specific proposals will be prepared to include a [scope of services, schedule and fee](#). The proposal will be prepared by a team that includes the Contract Manager, Project Executives and Project Manager.

Once a notice-to-proceed is received, the Project Manager in coordination with Webb County staff will conduct a pre-task planning meeting to discuss the project with the team members, identify milestones and critical path items and discuss potential issues that may affect the execution of the project. [Working safely and efficiently](#) to meet the project objectives is our goal. We have found that by incorporating the model shown below into the management of our services, the availability of our team to furnish services is more [efficient](#) and [adds value](#) to the project.

We all understand that on any project, there is always potential for unforeseen challenges to arise and provide the Project Manager with an opportunity for professional and/or personal growth. In the event that circumstances require modifications be made to maintain the project schedule, the Terracon Project Manager can draw upon the resources of the 25 Terracon offices in Texas or multiple across the country to assist in schedule recovery. **This is done at no extra cost to Webb County.**

SAFETY

Safety is one of Terracon’s core values and our commitment to an “Incident and Injury Free (IIF)” philosophy is one of the pillars of our culture. Successful execution and delivery includes the need to work safely and keep our employees and the public safe every day. Terracon is very much a safety-oriented company. We strive to build health and safety into all aspects of our business and into the thinking of our employees. The culture is continued further in our everyday work culture, with all meetings beginning with an IIF moment and safety discussion. Having these values will be a beneficial asset for Webb County.

KNOWLEDGE OF GEOGRAPHICAL AREA

Terracon has been operating in Laredo and surrounding areas since 2000, our firm has an excellent knowledge of Laredo, and the local contractors and regulatory agencies. We achieve an above-standard level of professionalism in the industry. Allowing dedication to the project and our professionalism to be our guide, we know that our staff will complete Webb County's project with quality and integrity.

The project managers and support staff proposed for this project have worked with Webb County before as well as working with similar clients, such as the City of Laredo project management staff, providing materials testing, geotechnical and environmental services since 2005 and we have been providing similar services to the local school districts, TAMIU, Texas Department of Transportation, the US Border Patrol/Homeland Security Administration, and numerous local property management and development clients.

We are very aware of the vibrant nature of the Laredo economy and have enjoyed participating in the unprecedented growth the area has enjoyed in the past few years. We have assembled a project team which is appropriately trained, licensed, and equipped, and we are prepared to continue to deliver responsive, cost-effective services to Webb County.

Terracon offers a unique mix of professional staff and experienced technicians that are familiar and comfortable working with both private and public sector clients. In other words, we can bring our services with ***no learning curve***, a proven record of accomplishment and history of excellent performance to Webb County. Terracon services will meet all requirements and requests as defined by Web County.

Terracon has provided services on the Webb County projects noted below for the Engineering Department:

- ADA Splash Project
- ITB 2022-002 Espejo Molina Overlay
- ITB 2022-005 Pueblo Nuevo Overlay Project
- ITB 2022-003 Las Lomas Road Overlay
- ITB 2022-004 Penitas Road Overlay
- Wormser Rd Realignment
- Proposed Water Dispenser Station
- USDA Quarantine and Tick Eradication Facility
- La Presa Park Athletic Improvements and Playground
- Webb County Buenos Aires Community Center
- Lake Casa Blanca Dam-Slope Stability Analysis
- Rio Bravo Drainage Channel
- Casa Blanca Dam Site Assessment
- New Community Center
- Veteran's Coalition - 413 San Bernardo
- Webb County Youth Village
- Rancho Penitas
- New Community Center
- Former Dipping Vat Affected Property Assessment
- Former Dipping Vat Phase II
- Former Dipping Vat Site
- Soil Sampling & Analysis
- Former Dipping Vat
- Saint Augustine High School, Phase I and II
- 18.1-Acre Tract
- Webb County Youth Village
- 204M3076A-Webb County

TERRACON'S GIS PROJECT SYSTEM

Our clients don't have to worry about Terracon's knowledge of the site conditions in our local areas. We've not only been delivering projects locally to Webb County for more than 20 years, but we've also been systematically recording our footprint using our project databases and a Geographic Information System (GIS) Project Query system. The fact that we can pull up reports on past projects makes it convenient for our clients to work with us because we are able to avoid a wide variety of potential site issues because of this system. The GIS Project Query system queries and displays projects on either a street or aerial map based on their latitude and longitude values. This allows the user to graphically determine which projects Terracon has worked on near a specific location.

In practical terms this means that if we have previously don't work close to your site, we can easily retrieve soil and groundwater information to effectively inform you and develop a more focused proposal. This translates to savings for you by potentially reducing, perhaps, the depth or number of borings, type of drilling, or turnaround time for the report. Strategic use of this data helps to develop preliminary information to help efficiently guide the early stages of the project. We not only know the site conditions, but the building officials, regulators and stakeholders involved in case there are problems associated with the site.

As demonstrated by the figure below (showing only our material testing projects in Webb County since 2005), we have performed [more than 755 material testing projects throughout the county](#)—and these are just a small sample of our data from the region.

LOCAL AREA CONSTRUCTION PRACTICES

Construction practices that are typical for a geographic area generally result in more competition from contractors and a better end result for Webb County and users. Having said that, in some cases it makes sense to try something different and innovative in order to advance the state of the practice and, in the long run, reduce costs and improve quality of the completed project.

Given our long-term experience with local projects, we are well versed on the design and constructability related to many aspects of construction including:

- Subgrade improvements (lime, cement, asphalt emulsion)
- Design using geogrids and other pavement interlayers
- Pavement materials (reused, recycled, new)
- Subsurface interceptor drains
- Shallow (footings, slab on grade) and deep (drilled piers on the casing and/or slurry) foundations.
- Utility trenches (backfill and provisions for loss of fines)

Working closely with the contractor, we can help talk and think through sequencing of construction to help reduce costs, shorten schedules and maintain quality.

MATERIALS TESTING SERVICES OVERVIEW

Terracon's materials testing department offers a unique mix of professional staff and experienced technicians that are familiar and comfortable working within the education sector.

Proper selection, quality and workmanship of construction materials play a vital role in ensuring that today's buildings and infrastructure perform adequately over long time periods. We work with clients to minimize material replacements, reduce the likelihood of deterioration, avoid potential failures, and investigate and evaluate construction materials related problems and failures when they do occur.

Local knowledge and resources, combined with the technical support available from our national network of offices, enable Terracon to respond quickly to ever-changing construction needs and schedules. We respond with innovative solutions and alternatives that target your long-term performance objectives while considering cost consequences. Our services are delivered on a timely basis with consistently high value and attention to client needs. Construction materials' testing is Terracon's largest in-house service line and boasts a staff of highly trained and experienced technicians, and a diverse service offering.

Construction Materials Testing services we provide include:

- On-site observation and monitoring of earthwork activities and foundation construction
- Consulting for construction material selection, compatibility, and acceptability
- Construction quality control and quality
- Forensic investigation and evaluation of in-place construction materials

- assurance programs
- Field and laboratory testing and analysis of soil, concrete, aggregates, grout, asphalt and fireproofing
- Pavement materials engineering
- Special Inspections

Certified Technicians

Terracon's personnel are NICET, ACI, CWI and TxDOT certified with experience on many large construction materials testing projects in South Texas. Many of Terracon's professional and technical staff serve on the boards or regularly participate in organizations developed to improve the science of engineering testing and inspection such as the American Concrete Institute, ASTM, American Association of Laboratory Accreditation, ASCE Materials Section, the Texas Council of Engineering Laboratories and the National Institute of Certified Engineering Technicians.

Equipment

Terracon prides itself on being highly responsive to client needs. If equipment is not readily available in the Texas offices, it can be shipped overnight from one of Terracon's more than 140 offices nationwide. Our considerable resources allow for quick and reliable turnaround time, which benefits The City of Laredo through consistent quality.

Laredo Office:

- Fully equipped office with approximately 6,000 square feet to test aggregates asphalt, soil, concrete mortar and grout.
- Compression machine for testing concrete, mortar and grout. Specimens are cured in water tanks in our 440 square feet curing room.
- Nuclear density gauges and sand cone equipment for use on soils and asphalt.
- Air meters to determine air content in concrete.
- Our Technicians wear company shirts that identify them with their names and drive clearly marked company pickups.
 - The Laredo office has 9 company trucks that are fully equipped with GPS tracking systems.
- Our technicians are equipped with cellular phones for dispatching purposes and for communications with clients. They can be contacted after hours and weekends.
- Our technicians are equipped with laptops for electronic data collection and reporting
- Floor profile measuring device (Face Dipstick).
- Hilti SP 1000 and James Instruments *RebarLoctor* that can identify conduits, rebar and tendons up to 12 inches and 6 inches deep, respectively, in concrete.

TERRACON'S SEAMLESS SERVICE DELIVERY

Terracon's proprietary data management system generates real-time test results of critical information, keeping you informed of all test results and keeping your project moving forward.

- 24-hour report turn-around for non-conformance items and failing tests
- Custom report delivery that can be shared with multiple entities
- Real-time reporting keeps you and your project team informed, saving time and money.

Project Work Plan and Schedule

Benefits:

- Experienced staff with the right certifications
- Tracking and responding to manpower needs
- Responding to workload fluctuations

Budget Tracking

Benefits:

- Constant communication – daily, weekly, monthly
- Milestone notifications monitor your investment
- Retest tracking for potentially significant savings

Field Observation, Data Collection, Reporting and Delivery

Benefits:

- Fast collection through hand-held devices, high-tech tablets, and laptops
- Efficient transmittal of data to Project Manager
- Keeps the project moving forward with seamless delivery of information

Communication of Results to All Parties

Benefits:

- E-mail notifications
- Easy to read reports with third-party access
- Close out – push of a button
 - Report library
 - Data storage
 - Final letters

TERRACON LABORATORIES

Terracon operates geotechnical and **materials** laboratories throughout the nation that are equipped to perform a wide variety of tests on soil and bedrock materials. Our laboratory meets the requirements outlined in the American Society for Testing and Materials (ASTM) E 329 Standard and is accredited to work on TxDOT and Local Area Management (LAM) projects (see certifications on following pages). Terracon complies with established national and industry standards and maintains an in-house quality assurance program to make certain that the firm provides quality services and accurate testing. Terracon is regularly inspected by the National Institute of Standards and Technology through the AMRL (AASHTO Materials Reference Laboratory) and CCRL (Cement and Concrete Reference Laboratory) accreditation programs. The U.S. Army Corps of Engineers validates our laboratory by reviewing these inspections. Terracon performs following field and laboratory testing/inspection services:

Soils

- Soil classification
- Moisture-density relationships
- In-place density
- Subgrade stabilization: lime, cement, fly ash, geotextiles, and geogrids
- Bearing strata evaluation for footings
- Deep foundations: drilled and driven piles, drilled piers

Concrete

- Mix designs and trial batches
- Batch plant and placement evaluations
- Cylinder and beam testing
- Rebar location, ultrasonic testing, Windsor probe and V-meter
- Portable laboratory facilities
- Chloride ion content
- Rapid chloride ion permeability
- Maturity meter evaluations
- Half cell corrosion measurement
- Diamond bit coring

Masonry

- Block prism tests
- Mortar and grout mix design
- Block shrinkage

Bituminous Mixtures

- Mix designs
- Batch plant calibration
- Field observation and testing of asphaltic concrete pavements
- Density determination: in-place nuclear density and core density
- Marshall and Hveem test properties
- Percent asphalt content
- Gradations

Aggregates

- Gradation analysis
- Specific gravity
- Absorption
- Abrasion
- Soundness
- Deleterious materials
- Freeze-thaw
- Acid Solubility

Flexible and Rigid Pavements

- Nondestructive testing with heavy weight deflectometer and ground penetrating radar
- Pavement condition index (PCI) distress surveys
- Subgrade assessment
- Street acceptance testing

Structural Steel

- Fabrication shop inspection
- Erection observation and testing
- Field testing of structural steel connections
- Nondestructive testing: dye penetrant, ultrasonic, magnetic particle
- Bolt tension testing
- Procedure qualification, welder qualification

Asphalt

- Optimum mix design through superpave, marshall, and hveem test methods
- Laboratory testing of aggregate properties, extraction, and gradation

Other Specialties

- Video, bore scope evaluations
- UBC "Special Inspections"
- Data analysis/interpretation
- Failure/damage evaluation

Offerors must provide the following identifying information:

a. Name and address of business entity submitting the proposal;

Terracon Consultants, Inc.
615 Gale St.
Laredo, TX 78041

b. Type of business entity (i.e., corporation, partnership);

Corporation

c. Place of incorporation, if applicable;

10841 S Ridgeview Rd.
Olathe, KS 66061

d. Name and location of major offices and other facilities that relate to the Offeror's performance under the terms of this RFQ.

Terracon San Antonio Office
6911 Blanco Road
San Antonio, TX 78216

e. Name, address, business and fax number of the Offeror's principal contact person regarding all contractual matters relating to this RFQ.

Juan Carlos
Laredo Office Manager
615 Gale St, Laredo, TX 78041
P: (956) 729-1100
F: (956) 791-1071

f. Full name and business address for each member, partner, and employee of the Offeror (and any sub-offerors) who will perform services on this project; and

Terracon Laredo
615 Gale St.
Laredo, TX 78041

Terracon San Antonio
6911 Blanco Road
San Antonio, TX 78216

g. A statement regarding the financial stability of the Offeror, including the ability of the Offeror to perform the functions required by this RFQ and to provide those services represented by the Offeror in its response.

Terracon is a privately held corporation that has been providing consulting services since 1965. For the year ending December 31, 2021, the company had gross revenue of \$909 million. We are a 100 percent employee-owned corporation. Terracon is financially stable and is able to perform the functions required by this RFQ and provide the services represented.

E. Personnel Qualifications

All team members resumes that are included are the following pages were involved in the projects noted in Section B. Please refer to their resumes for additional information on their qualifications and project experience working on similar road projects for municipalities.

The scope of work that Webb County is requesting is precisely the scope of work that Terracon performs on a daily basis for many of our municipal clients. Our typical project duration ranges from a few days to many months, dependent upon our clients' needs. As a result, we are on a consistent cycle of working through and closing out our current projects making us ready for our next assignment. Our clients may assign us one site at a time, or they often assign us a portfolio of multiple sites. Multiple-site projects are generally made up of several small to medium-sized projects, with the Project Managers assigning staff as appropriate so that each project is staffed by qualified personnel trained for the requirements of that specific project. This business model has allowed Terracon to develop the capability to meet workload demands as we excel in our execution of projects such as those anticipated by Webb County.

Terracon assigns seasoned Project Managers to oversee work assignments such as those proposed by Webb County. These Project Managers are experienced and have demonstrated the ability to manage multiple jobs. They assist the client in identifying and resolving potential conflicts and assembly and material compatibility issues, thereby reducing change orders and warranty issues. The Project Managers are dedicated to serving the client's needs in a conscientious and ethical manner. Terracon's extensive resources are available for the successful performance of Webb County's need for Materials Testing Services for County projects.

Terracon is ready and eager to assist Webb County in achieving its goals by providing the following:

- **TEAM Approach** - Terracon proposes to function as an extension of Webb County's organization. This TEAM-oriented concept will allow us to interact with other outside firms as well as the Webb County. Terracon will act as a liaison between Webb County and the many architects, engineers, contractors and other professionals involved in the projects.
- **Staff Qualifications** - Terracon will supply qualified and certified professionals under the direct supervision of Professional Engineers licensed in the State of Texas for all Webb County projects. The primary charge of a Professional Engineer is to protect the public health, safety and welfare above all other interests, and we believe that Webb County shares this belief.
- **Staffing and Responsiveness** - Terracon will adjust the number of staff members assigned to the projects to correspond with Webb County's needs; however, Terracon will maintain continuity in our staff in order to preserve project knowledge and procedures.

Juan Carlos Rendon, M.S. **CONTRACT MANAGER**

PROFESSIONAL EXPERIENCE

Mr. Rendon is a bilingual Office Manager (Spanish, English) in our Laredo, Texas office and has over 25 years of experience directing business groups, projects, and staff in fast-paced, results-oriented environments in multi-million-dollar projects. Articulate communicator able to elicit outstanding performance from a diverse array of professionals. Highly successful in developing synergistic relationships to bring projects to completion on time and under budget in a safe and quality-oriented job site. Diverse operational experience extends to finance/accounting, purchasing/materials management, logistics, quality, safety assurance, scheduling, estimating, information systems, and sales.

His day-to-day responsibilities include planning, organizing, directing, and coordinating all office activities (administrative and technical). This includes general profit/loss management practices, employee supervision, project management, client relations and development, new business development and contract administration.

He has participated in LEED Certification of Projects and has extensive knowledge in Concessions and Public-Private Partnerships (PPPs), from its creation, construction, commissioning, and operation.

PROJECT EXPERIENCE

City of Laredo Projects:

- Laredo World Trade Bridge Fast Lane Relocation
- Barbara Fasken Community Center Park Improvement
- Laredo International Airport Cargo Apron Phases 13 & 14
- Laredo International Airport Taxiways H1 – H2
- Corpus Christi Street Widening, Drainage, and Utility Replacement
- Fire Station #8*

United ISD Projects:

- Aquatic Center
- United South High School Additions
- Clark Elementary School
- Various High School Athletic Fields
- Existing Natatorium Pool Backfill
- Bonnie Garcia ES Drainage System Upgrade
- Washington MS Erosion Control
- Newman Flooring Renovation (\$354K) *
- Newman Elementary Cafeteria Addition (\$1.5M) *

Safety | Pre-Task Planning

Terracon views pre-task planning as the most proactive activity that we can do to maintain an Incident and Injury Free workplace. It is required from the very beginning when preparing a proposal and starting projects, as well as when we assign work and execute tasks throughout the day. Employees at all levels have the responsibility for ensuring Pre-Task Planning is done effectively. We ask all our employees prior to doing a task, to take time to review how you will do the task safely, determine if the work conditions are what you expected to do the job safely, and repeat Pre-Task planning prior to starting any new task. In addition, our project managers discuss and address site specific safety considerations and concerns on our projects with not only our project and field staff but also through regular communication with our clients and their project team so as to understand their safety concerns and requirements as well.

Terracon's APR Program

To ensure that project and Terracon quality control and quality assurance requirements are achieved, our Project Manager is accountable for the overall quality of the project. The Project Manager is also responsible for verifying that the applicable quality control criteria, project quality review and company policies have been followed. We further our commitment to quality even more by designating an Authorized Project Reviewer (APR) to each project. Technical staff and senior professionals are appointed as APRs through a highly selective process, which maintains quality and consistency of Terracon project deliverables.

Terracon's Quality Program is based on a continuous improvement philosophy that involves our employees, vendors, and users of our services. The system is predicated on the integration of quality throughout the entire process from the proposal phase through project implementation and development of deliverable documents. Quality service for our clients is achieved by following the methods and practices that have been developed at Terracon for the services being provided. Terracon also continuously seeks to find improvements in practices and procedures to better serve our client's needs.

CONFLICT OF INTEREST QUESTIONNAIRE
For vendor doing business with local governmental entity

FORM CIQ

This questionnaire reflects changes made to the law by H.B. 23, 84th Leg., Regular Session.

This questionnaire is being filed in accordance with Chapter 176, Local Government Code, by a vendor who has a business relationship as defined by Section 176.001(1-a) with a local governmental entity and the vendor meets requirements under Section 176.006(a).

By law this questionnaire must be filed with the records administrator of the local governmental entity not later than the 7th business day after the date the vendor becomes aware of facts that require the statement to be filed. See Section 176.006(a-1), Local Government Code.

A vendor commits an offense if the vendor knowingly violates Section 176.006, Local Government Code. An offense under this section is a misdemeanor.

OFFICE USE ONLY

Date Received

2.J Name of vendor who has a business relationship with local governmental entity.

Terracon Consultants, Inc.

Check this box if you are filing an update to a previously filed questionnaire. (The law requires that you file an updated completed questionnaire with the appropriate filing authority not later than the 7th business day after the date on which you became aware that the originally filed questionnaire was incomplete or inaccurate.)

Name of local government officer about whom the information is being disclosed.

N/A

Name of Officer

Describe each employment or other business relationship with the local government officer, or a family member of the officer, as described by Section 176.003(a)(2)(A). Also describe any family relationship with the local government officer. Complete subparts A and B for each employment or business relationship described. Attach additional pages to this Form CIQ as necessary.

A. Is the local government officer or a family member of the officer receiving or likely to receive taxable income, other than investment income, from the vendor?

Oves DNo N/A

B. Is the vendor receiving or likely to receive taxable income, other than investment income, from or at the direction of the local government officer or a family member of the officer AND the taxable income is not received from the local governmental entity?

Dves DNo N/A

Describe each employment or business relationship that the vendor named in Section 1 maintains with a corporation or other business entity with respect to which the local government officer serves as an officer or director, or holds an ownership interest of one percent or more.

D Check this box if the vendor has given the local government officer or a family member of the officer one or more gifts as described in Section 176.003(a)(2)(B), excluding gifts described in Section 176.003(a-1).

CERTIFICATION
REGARDING DEBARMENT, SUSPENSION, INELIGIBILITY AND VOLUNTARY
EXCLUSION FOR COVERED CONTRACTS

PART A.

Federal Executive Orders 12549 and 12689 require the Texas Department of Agriculture (TOA) to screen each covered potential contractor to determine whether each has a right to obtain a contract in accordance with federal regulations on debarment, suspension, ineligibility, and voluntary exclusion. Each covered contractor must also screen each of its covered subcontractors.

In this certification "contractor" refers to both contractor and subcontractor; "contract" refers to both contract and subcontract.

By signing and submitting this certification the potential contractor accepts the following terms:

1. The certification herein below is a material representation of fact upon which reliance was placed when this contract was entered into. If it is later determined that the potential contractor knowingly rendered an erroneous certification, in addition to other remedies available to the federal government, the Department of Health and Human Services, United States Department of Agriculture or other federal department or agency, or the TOA may pursue available remedies, including suspension and/or debarment.
2. The potential contractor will provide immediate written notice to the person to which this certification is submitted if at any time the potential contractor learns that the certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
3. The words "covered contract", "debarred", "suspended", "ineligible", "participant", "person", "principal", "proposal", and "voluntarily excluded", as used in this certification have meanings based upon materials in the Definitions and Coverage sections of federal rules implementing Executive Order 12549. Usage is as defined in the attachment.
4. The potential contractor agrees by submitting this certification that, should the proposed covered contract be entered into, it will not knowingly enter into any subcontract with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the Department of Health and Human Services, United States Department of Agriculture or other federal department or agency, and/or the TDA, as applicable.

Do you have or do you anticipate having subcontractors under this proposed contract?

Yes

No

5. The potential contractor further agrees by submitting this certification that it will include this certification titled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion for Covered Contracts" without modification, in all covered subcontracts and in solicitations for all covered subcontracts.
6. A contractor may rely upon a certification of a potential subcontractor that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered contract, unless it knows that the certification is erroneous. A contractor must, at a minimum, obtain certifications from its covered subcontractors upon each subcontract's initiation and upon each renewal.
7. Nothing contained in all the foregoing will be construed to require establishment of a system of records in order to render in good faith the certification required by this certification document. The knowledge and information of a contractor is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
8. Except for contracts authorized under paragraph 4 of these terms, if a contractor in a covered contract knowingly enters into a covered subcontract with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the federal government, Department of Health and Human Services, United States Department of Agriculture, or other federal department or agency, as applicable, and/or the TOA may pursue available remedies, including suspension and/or debarment.

PART B. CERTIFICATION REGARDING DEBARMENT, SUSPENSION, INELIGIBILITY AND VOLUNTARY EXCLUSION FOR COVERED CONTRACTS

Indicate in the appropriate box which statement applies to the covered potential contractor:

The potential contractor certifies, by submission of this certification, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this contract by any federal department or agency or by the State of Texas.

The potential contractor is unable to certify to one or more of the terms in this certification. In this instance, the potential contractor must attach an explanation for each of the above terms to which he is unable to make certification. Attach the explanation(s) to this certification.

CERTIFICATION REGARDING FEDERAL LOBBYING
(Certification for Contracts, Grants, Loans, and Cooperative Agreements)

PART A. PREAMBLE

Federal legislation, Section 319 of Public Law IO1-121 generally prohibits entities from using federally appropriated funds to lobby the executive or legislative branches of the federal government. Section 319 specifically requires disclosure of certain lobbying activities. A federal government-wide rule, " New Restrictions on Lobbying", published in the Federal Register, February 26, 1990, requires certification and disclosure in specific instances.

PART B. CERTIFICATION

This certification applies only to the instant federal action for which the certification is being obtained and is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$100 ,000 for each such failure.

The undersigned certifies, to the best of his or her knowledge and belief, that:

1. No federally appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, or the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.
2. If any funds other than federally appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with these federally funded contract, subcontract, subgrant, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, " Disclosure Form to Report Lobbying ", in accordance with its instructions. (If needed, contact the Texas Department of Agriculture to obtain a copy of Standard Form-LLL.)

3. The undersigned shall require that the language of this certification be included in the award documents for all covered subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all covered subrecipients will certify and disclose accordingly.

Do you have or do you anticipate having covered subawards under this transaction?

Yes
 No

ADDENDUM NUMBER 1 TO THE RFQ DOCUMENTS

Addendum Date: September 19, 2022

RFQ DOCUMENT NUMBER RFQ 2022-011

“On Call Material Testing Services for County Projects”

A. This Addendum shall be considered part of the RFQ documents for the above-mentioned project as though it had been issued at the same time and shall be incorporated integrally therewith. Where provisions of the following supplementary data differ from those of the original bid documents, this Addendum shall govern and take precedence. **RESPONDENTS MUST SIGN THE ADDENDUM AND SUBMIT IT WITH THEIR BIDS/PROPOSALS.**

B. Respondent are hereby notified that they shall make any necessary adjustments in their estimates as a result of this Addendum. It will be construed that each bidder's proposal is submitted with full knowledge of all modifications and supplemental data specified herein.

Except as described below, the original bid document remains unchanged. The RFQ documents are modified and/or clarified, as follows:

Modification to the Cover page and Section 5 Background and Scope of Services:

- Webb County is currently seeking to retain up to three (3) qualified Engineering Firms to provide Material Testing Services on an on-call basis. The services will be assigned on an as-needed basis for various projects and efforts initiated by Webb County for a three (3) year performance period ~~effective October 1, 2022 through September 30, 2025~~. They may be short term assignments or may be part of larger capital project assignments. This document outlines the requirements, selection process and documentation necessary to submit a Statement of Qualifications (SOQ) in response to this RFQ. This solicitation will comply with the State of Texas Government Code; Professional Services Procurement Act and if applicable with the Code of Federal Regulations §200.318 - §200.327 (General Procurement Standards).
- **Effective on the date the professional services agreement is fully executed.**

RESPONDENT MUST ACKNOWLEDGE THIS ADDENDUM BY SIGNING BELOW AND ATTACHING THE SIGNED ADDENDUM TO THE PROPOSAL FORM(S):
