Conduct Video Survey of Two Existing Wells to Determine Status - Collier will conduct a downhole video survey of the two existing wells to determine their current condition and if well rehabilitation is a viable alternative. County will be responsible for contracting with a well servicer to remove equipment from the well (pump, column pipe) prior to the survey. Cost assumes that both wells will be surveyed during the same field mobilization.	\$7,700.00	
Milestone 1-3. Sample Water Quality in Two Existing Wells to Determine Salinity - Collier will collect water samples from the existing wells and send for laboratory analysis. Analysis will include concentrations of total dissolved solids, chloride, sodium, boron, and other salts detrimental to vegetation health. If possible, Collier will use existing equipment to perform the sampling. Otherwise, equipment needed to perform the production tests (i.e., pump, piping, flow meter, generator, fuel, etc.) will be furnished and installed by the County and/or their drilling contractor.	\$5,300.00	
Milestone 1-4. Develop Plan for Groundwater Production and Most Probable Cost Estimates - Based on the above information, Collier will develop a proposed plan for either a) rehabilitation of the existing wells or b) construction of new wells to meet the irrigation needs of the golf course, as communicated to us by the County. Based on historical data and current market conditions, Collier will provide the County with a budget estimate associated with these options.	\$7,200.00	
Milestone 1-5. Create Written Report - Collier will develop a written report outlining the findings of this phase and its recommendations and present it at a virtual meeting with the County and the County's stakeholders.	\$5,400.00	
<b>Total Phase I</b>		<b>\$30,900.00</b>
<b>Phase II: Design, Engineering, and Bidding</b>		
Milestone 2-1. Prepare Plans and Specifications for Two Irrigation Wells - Collier will prepare plans for a well under the supervision of Collier's licensed professional engineer and submit to the County for approval. The well plans will be based on available site-specific hydrogeology. The County will provide, as required, easements, a surveyed plat, and surveyed well location. County acknowledges that Collier cannot guarantee performance outcomes for the well or that the aquifer will produce the required inflow quantity.	\$14,750.00	
Milestone 2-2. Prepare Plans and Specifications for Transfer to Storage Ponds - In this option, Collier will design a pipeline (within the footprint of the existing course) to transfer water from the well to storage in a surface water body. Design will include the pipeline and the booster pumps needed to transmit the water.	\$11,300.00	
Milestone 2-3. Prepare Plans and Specifications for Ground Storage Tank - In this option, Collier will prepare plans for the use of a 500,000-gallon ground storage tank on site. Design will include tank foundation, booster pumps, and connection to the	\$23,000.00	

irrigation system. County is aware that additional geotechnical investigation may be necessary for foundation design depending on local conditions.	
Milestone 2-4. Prepare, Solicit, and Evaluate Public Bid Documents - Collier will prepare and solicit a public bid for the well. Collier will evaluate received bids and prepare a recommendation for awarding.	\$9,850.00
Milestone 2-5. Prepare and Administer Contract and Change Orders - Collier will assist in preparing the bid documents and contracts. Collier will also provide contract administration of change orders.	\$4,930.00
<b>Total Phase II</b>	<b>\$63,830.00</b>
<b>Phase III: Drilling Oversight and Testing</b>	
Milestone 3-1. Monitor the Drilling, Drilling Fluid Program, and Sample Collection - Collier staff will be on site when the rig arrives on location and periodically during the drilling of the production interval to monitor drilling, measure drilling fluid properties, monitor sample collection, and describe the drill cuttings. Collier will monitor drilling practices to ensure that the contractor is adhering to the specifications. This task assumes up to 3 ten-hour days on site by a geologist or experienced technician for each well.	\$13,250.00
Milestone 3-2. Analyze the Borehole Geophysical Logs and Integrate with the Cuttings to Determine Screen Placement - For each well, Collier will analyze the borehole geophysical logs provided by the drilling contractor. Using these and the cuttings, Collier will determine the placement of the well screen to optimize groundwater production.	\$3,200.00
Milestone 3-3. Assist in the Selection of Well Materials and Monitor Installation - The well will be designed for the specific site geology, as anticipated prior to drilling. Based on information obtained during drilling, Collier will assist the driller in selecting the correct gravel pack, screen, and depth. Collier will monitor construction during the installation of the screen, casing, gravel pack, and pressure cementing. Based on the caliper log, Collier will assist the drilling contractor in the calculation of material volumes needed for both the gravel pack and the cement. Collier will also verify that sufficient volumes are used, and that cement returns to the surface. This task assumes up to 2 ten-hour days on site by a geologist or experienced technician for each well.	\$6,200.00
Milestone 3-4. Monitor Well Development - Collier will assist in choosing the most efficient development techniques and verify when development is complete and the pump should be installed. This task includes up to 2 eight-hour days spent onsite by a geologist or experienced technician for each well.	\$7,000.00
Milestone 3-5. Review the Video Survey and Prepare As-Builts - The Collier team will review the video survey of the well to determine conformance to the specifications and the quality of the installation. As per industry custom, the video survey will be conducted and billed separately under the drilling contract; Collier may also act as the subcontractor to perform the survey, at the County's discretion. The Collier engineering staff will also prepare a set of as-built drawings showing the final construction of the well.	\$8,750.00
<b>Total Phase III</b>	<b>\$38,400.00</b>
<b>Total all Phases</b>	<b>\$133,130.00</b>
