PROVEN LEADERSHIP FOR  
WEBB COUNTY

## Your Team

Our strategic partnership with Metaform and HDR brings an interdisciplinary, collaborative approach to design and management in order to deliver a solution that exceeds your goals. We offer a unique approach for this project—one that combines local perspective, global expertise, a reputation for on-time and on-budget-projects, unmatched commitment to design excellence, a shared enthusiasm for your Webb County project, and the specialized knowledge that this project requires to be successful.

# PROCESS

For each and every project, we begin our approach with a collaborative visioning session with the client to capture the project's vision and goals. Moving forward, our process is focused and organized to generate deep insight into complex problems and encourage rapid prototyping that yields conceptual development. For the next stages, HDR has refined its design process to be streamlined and integrated into your decision-making process by using the concept of Preview, Review, Endorse to systematically advance the project.

# PLANNING

HDR has a proven track record of delivering projects on time and on budget. Below are our top strategies that HDR employs to ensure stewardship of client resources.

TRANSPARENCY

REVENUE AND  
COST PLANNING
