About BIS Digital

BIS Digital has been in the audio and video industry since 1982 and offers a wealth of experience in providing integrated solutions for entities of all sizes. Headquartered in Ft. Lauderdale, Florida, the company has over 90 employees with direct sales and service representatives throughout the US.

Our primary business is the sale, service, and support of multi-channel digital audio/video systems and recording software for the judicial and courtroom systems; city/county governments; public safety and interview rooms; and private enterprises. Other areas of expertise include software-based enterprise room control, AV electronic hardware and software integration, video presentation technology and tv broadcast systems, and digital sound/audio reinforcement.

In addition to our comprehensive AV solutions, we provide a range of video conferencing options for remote video arraignment and other court conferencing needs, in either hosted or non-hosted formats. We also offer remote language translation connectivity and digital dictation, as well as meeting agenda automation, live streaming, web hosting, and on-demand systems. From concept to completion, we have provided these technologies to over 6,000 customers.

The strategic direction for BIS digital has been to develop solutions that operate in an open architecture environment, are user-friendly, and can be accessed on PCs, tablets, and smartphones. We work with award-winning manufacturers to design fully integrated AV capabilities for optimal workflow and efficiency. All our solutions are developed to work seamlessly with our core DCR audio and video recording software and any current case management software being utilized in the courts and other spaces today.

As such, our team has a deep understanding of the unique requirements in these settings and the importance of reliable and effective AV systems. Our priority is to work closely with our clients to ascertain their specific needs and design a system that meets them. With that said, to us, technology integration and support is more than a project. It's a partnership. It's why we also offer ongoing maintenance and support for our AV systems, as well as providing training and technical assistance to users. We strive to build long-lasting relationships with our clients and exceed their expectations at every opportunity.

Audio/Video Equipment and Broadcasting Experience

BIS Digital has provided tens of thousands of clients with audio visual integration across the country. We currently have offices in 15 states but will often cross state borders to offer our services throughout the Eastern and Southern US. We primarily support Government and Courts, Law Enforcement, and Children's Advocacy Centers, providing top of the line technology to ensure flawless communication both within and outside of the room.

We have completed integration in many courts at all levels including Federal and State Courts such as the Texas Criminal Court of Appeals, as well as District, County, and Municipal Courts such as 63rd and 83rd Districts in Val Verde County, or Arlington Municipal Court in the Dallas Metroplex.

We also support many law enforcement agencies such as the Border Patrol in Laredo, TX, and have provided our Children's advocacy clients with specialized interview integration in several locations such as Harold's House in Nacogdoches, TX or The Martin House in Longview, TX.

We providing a full range of audio visual and integration services including but not limited to microphones, sound systems, video displays, video signage, video switching and routing, broadcast, hybrid video conferencing, recording, virtual court, and audio/video security features. We regularly receive referrals from Offices of Court Administration throughout the country, including Texas, for our services.

Our clients have had some wonderful things to say about us:

"Alex's training and updating our BIS software was probably one of the best sessions I have had in my very long career. His knowledge was impeccable, and patience was above and beyond."

- Rebecca V, North Texas Client

"I want to thank you for your quick response and service. You gave me a lot of patience and guidance in making the decision with Televic and Cynap. We've had a lot of comments in respect to the improvement of the audio and video system in our chambers and the Cynap/ Televic system themselves and the ease with which to use them. Day and night from what we were doing before.

- Tim G, Florida Client

Support and Service Overview

At BIS Digital, we are committed to meeting our customers' service and support requirements and honoring all product warranties. We also offer comprehensive maintenance programs that include on-site and remote support, service, and training in addition to warranty fulfillment. Complete details are available upon request.

We have a 24/7 toll-free service hotline staffed by experienced technical service representatives, as well as options for placing service calls directly on our website or by phone. In most cases, we can resolve issues over the phone or in a video conference, but there may be times when an on-site visit is necessary. We use hosted customer relationship management (CRM) software to track the performance of our supported systems and our customers' services. Our technicians receive service calls through our internal service coordinator, and the cost of service coverage depends on the customer's service agreement. When a service call is completed, an automated email is sent to the customer with the results.

To ensure that we're responding quickly and efficiently to our customer requests and service issues, we've also implemented a Service Level Management Escalation Policy that outlines how we handle different levels of severity and how we communicate with our customers. Sometimes, we may need to escalate issues for technical or managerial reasons. Technical escalations involve bringing in additional expertise to resolve technical problems as quickly as possible, while managerial escalations involve higher levels of decision-making authority.

To optimize these systems, we ask every customer to contact the Technical Support Center first:

(800) 715-1234
Support@BISDigital.com

Annual support contracts are optional, are calculated as a percentage of the covered equipment, and are offered in three tiers - On-Site WITH Hardware Replacement, On-Site WITHOUT Hardware Replacement, and Remote WITHOUT Hardware Replacement. The annual pricing for these contracts as they specifically relate to the equipment included in the above price quote, pre-discount, are as follows:

On-Site WITH Hardware Replacement:	$22,906.80 Annually
On-Site WITHOUT Hardware Replacement:	$19,089.00 Annually
Remote WITHOUT Hardware Replacement:	$11,453.40 Annually

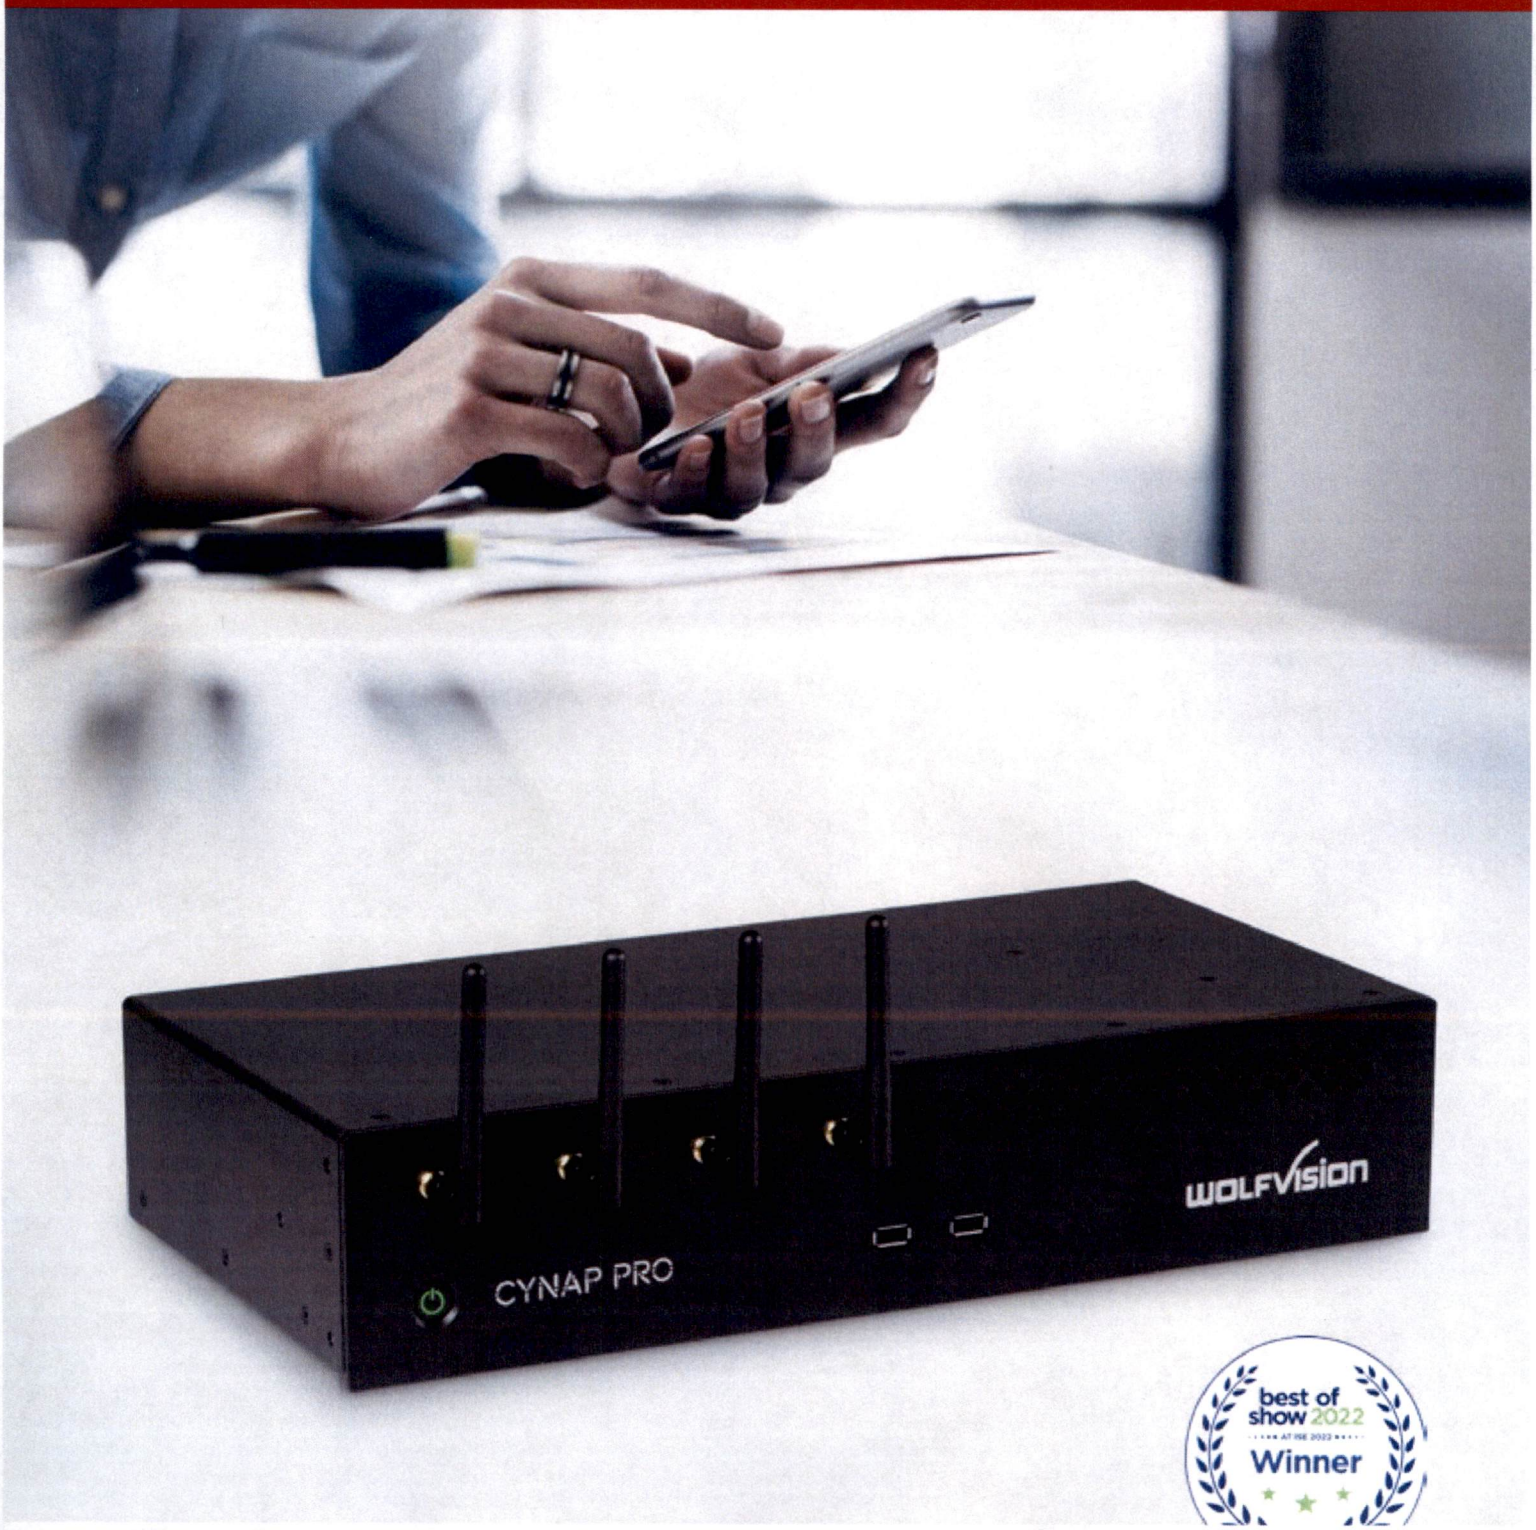
Driving Knowledge Creation

vSolution Cynap Pro

Wireless presentation, web conferencing & collaboration



Collaborative working & learning – In-person, remote and hybrid

Cynap Pro is a wireless presentation, web conferencing and collaboration system, providing wireless screen sharing for all iOS, Android, Windows, macOS, and Chrome OS devices, together with a unique set of web conferencing and collaboration tools.

The ideal centrepiece for modern classrooms, meeting spaces and courtrooms, this easy-to-use, all-in-one, AV appliance includes the new Cynap multi-platform web conferencing solution, which runs directly on a Cynap. It is designed to solve the issues most commonly experienced with BYOM web conferencing systems.

Zoom, Microsoft Teams and other web conferencing sessions all benefit from the seamless inclusion of multi-screen content from Microsoft 365, the built-in media player, web browser, or whiteboard, ensuring an outstanding, flexible, consistent, collaborative working experience for all – whether participants are in-person, remote-located, or a hybrid combination of both.

Cynap Pro also acts as the 'main station' for our popular vSolution MATRIX AV over IP multi-screen collaboration solution.

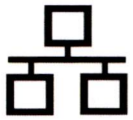
Driving Knowledge Creation.

System advantages

No apps, no dongles, no cables, no hassle!

Support for AirPlay, Miracast, and Chromecast screen mirroring means no apps, buttons, dongles or extra software are needed when sharing content on-screen from any smartphone, laptop or tablet.

Implementation advantages



The ability to configure three separate networks (ie. BYOD WiFi, control and admin, and internet service, offers significant advantages when planning your working and learning environments.

Best of both worlds connectivity!

Multi-source wireless screen sharing makes working together easier than ever before. For classroom, meeting space or courtroom installations that require additional connectivity options, two HDMI In ports, are also included, ideal for connecting an in-room PC, Visualizer or camera, etc.

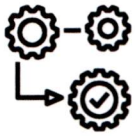
Display & share your files easily

Share your data on-screen easily from connected network drives, mobile devices or by using the Microsoft 365 interface. Even your laptop is no longer essential – simply bring your content on a USB stick, or download it directly from the cloud!

Webcasting: Efficient knowledge sharing

Stream content easily for live or on-demand viewing. Additionally, students or work colleagues on the same network as the presenter can receive and record a stream of on-screen content on their own mobile devices.

Remote management & administration



Our vSolution Link Pro software is supplied free of charge facilitating easy remote setup, monitoring, management, and updating of multiple systems across multiple locations.

Whiteboard and annotation

Highlight your content material using our easy-to-use annotation features, or add your own handwritten content using the built-in digital whiteboard. The whiteboard includes a collection of easy-to-use writing and drawing tools. It also includes a mind map feature, and the ability to pin content from a connected Visualizer or camera to the screen.

Staying connected in the hybrid world

Multi-platform web conferencing

Cynap Pro's multi-platform web conferencing solution runs directly on the device itself, and is designed to solve many of the issues most commonly experienced with BYOM web conferencing systems.

Complex multi-step setup, and bandwidth issues are eliminated, and Zoom, MS Teams or WebRTC-based wireless conferencing sessions are easily started and controlled, using a simple workflow, from a touchscreen, or any laptop, smartphone, or tablet.

Web conferencing sessions benefit from the easy inclusion of content from Microsoft 365, the built-in media player, web browser, or whiteboard, ensuring a flexible, consistent, hybrid working and learning working experience for all participants.
